

Jesus Carlos G. Lazaro

Don Antonio, Quezon City • jclazaro0321@gmail.com • +63 917 145 6760

Education

University of Santo Tomas

Sampaloc, Manila

Bachelor of Science in Computer Science, Data Science.

2023 - 2027

Thesis: Filipino Speech Deepfake Audio Detection Using a Real-Time Capable CNN–GRU Architecture with Acoustic Feature Fusion

Dean's List 2nd Year, 1st Semester (A.Y 2024 - 2025)

Dean's List 2nd Year, 2nd Semester (A.Y 2024 - 2025)

Dean's List 3rd Year, 2nd Semester (A.Y 2025 - 2026)

**Far Eastern University - Dr. Nicanor Reyes Medical Foundation
Science, Technology, Engineering, & Mathematics (STEM) Strand**

**Fairview, Quezon City
2021 - 2023**

Experience

Eskwelabs

Aug 2026 - Present

Innovation Fellowship – Data Innovation Track

- Participating in Eskwelabs' Innovation Fellowship under the Data Innovation Track, working on project-based data challenges and real-world problem-solving activities.
- Developing practical skills in data analysis, data visualization, and communicating data-driven insights through structured project sprints and collaborative work.

ArithMatrix

Sep 2026 - Present

Data Science Intern

- Selected for the ArithMatrix Virtual Internship Program 2026 under the Data Science division, a remote project-based internship focused on developing practical data science skills.
- Expected to complete technical and project-based deliverables while gaining exposure to data science applications and real-world business challenges during the 28-day internship.

Academic Projects

Lawig: An HR Recruitment App

2025 - 2026

System Analyst

- Served as System Analyst for Lawig, a web-based recruitment platform built for Lumawig Inc. to automate the applicant workflow from initial submission through onboarding.
- Analyzed client requirements and translated the end-to-end recruitment process — applicant tracking, interview scheduling with Google Calendar, technical exam management, and onboarding document uploads into system specifications and functional documentation for an 8-member development team.

Cannabis Use Risk Classification Using a Stacking Ensembles

2026

Co-Author

- Co-authored a research paper applying a stacking ensemble (Logistic Regression, Random Forest, SVM with a Gradient Boosting meta-learner) to cannabis-use risk classification on the UCI Drug Consumption dataset.
- Implemented and evaluated the Logistic Regression baseline model; contributed to the overall software architecture, manuscript drafting, and final formatting for submission.

ShopZada 2.0	2026
Data Modeling	
- Designed the conceptual, logical, and physical data models for an end-to-end data warehouse solution integrating ShopZada's fragmented business, customer, marketing, and operations datasets. - Defined the star schema, including fact and dimension tables, to support downstream ETL pipelines, analytical views, and BI dashboard reporting.	

TermGuessr: Mobile Application Project	2026
Co-Developer	
- Contributed to a Wordle-inspired mobile word-guessing game built in Flutter, featuring tile-based color feedback, animations, and an XP/leveling system. - Integrated Firebase Authentication and Cloud Firestore to support user accounts, sign-up/login, and persistent progress tracking.
